lancebailey222@gmail.com | lbailey.dev | linkedin.com/in/lance-bailey | github.com/lancebailey26

## SUMMARY

Full-Stack Engineer specializing in JavaScript/TypeScript, React, Next.js, and scalable web applications. Experienced building production features across frontend and backend systems, developing reusable component libraries, improving performance, and driving architectural initiatives. Strong collaborator with a track record of solving complex problems, adapting quickly, and delivering high-impact solutions in fast-paced environments.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript

**Frontend:** React, Next.js, HTML, CSS, CSS Modules, Storybook

**Backend:** Node.js, Express, REST APIs

**Databases:** MongoDB

**Tools & Practices:** Git, Agile/Scrum, Jira, Component Libraries, Monorepos, Multi-tenant Architecture, AI-assisted Development

## EXPERIENCE

### Principal Front-End Engineer / Full-Stack Engineer - Extend Platform

Tranztec Solutions | 2022-2026

- Served as the primary front-end engineer for the Extend Platform, owning the majority of customer-facing UI development across multiple production applications.
- Built and maintained production features across React, JavaScript, TypeScript, backend services, and MongoDB-backed workflows.
- Designed and implemented a reusable React component library with CSS Modules, CSS-variable theming, and Storybook documentation; became the standard foundation for new platform UI and accelerated feature delivery across teams.
- Developed complex partner-based permission systems supporting multi-tenant behavior across customer, partner, and internal user workflows.
- Led early monorepo migration planning and implementation efforts, improving maintainability, package sharing, and developer workflows across next-generation applications.
- Diagnosed and resolved complex production issues spanning frontend applications, backend systems, third-party integrations, and customer-facing workflows.
- Partnered closely with product, design, and engineering through planning, implementation, release cycles, and code review.
- Resolved the highest volume of Jira tickets on the team while maintaining delivery quality, responsiveness, and consistency.
- Researched and introduced AI-assisted development workflows to reduce repetitive work and improve engineering velocity.
